B300 Notebook

ALL PURPOSE 13.3" FULLY RUGGED NOTEBOOK

Our most popular model, the B300 rugged notebook has been called “The Best Rugged Laptop on the Market”. With state-of-the-art processors, incredible battery life and one of the brightest displays in the industry, the 5th generation B300 is the go-to ruggedised notebook for users that work in some of the most extreme conditions on the planet.

Customised Off-The-Shelf
The fact that we own our design and manufacturing process means that Getac can customise units to almost any configuration if the customer requires but we have two standard configurations of the B300 that should meet the majority of end users needs.

B300 BASIC MODEL (See back page for spec)
For the facility based mobile worker
The standard basic model of the B300 is designed for the mobile worker who needs the longer working day offered by the dual-battery and fully rugged credentials of the B300 but, perhaps being based indoors, does not require an ultrabright sunlight readable display.

With a range of accessories available as well as industry leading warranty, service and support options, this can be a complete mobile computing solution.

B300 PREMIUM MODEL (See back page for spec)
For the on-the-road mobile worker
The standard premium model of the B300 is designed for the mobile worker who needs the extra brightness of Getac's sunlight readable technology. With optional dedicated GPS and 4G/LTE, as well as Bluetooth® and tri-pass-through dock connection, this is the choice of workers who need to be connected wherever they are. Getac’s own innovative antenna technology and the ability to connect to a vehicles high-gain antenna ensure a maximum of signal strength and a minimum of coverage dropouts.

i. Share memory size may vary by different operating system and RAM size.
ii. Bluetooth performance and connectable distance may be subject to interference with the environments and performance on client devices, users may be able to reduce effects of interference by minimizing the number of active Bluetooth wireless devices that are operating in the area.
iii. Battery life testing conducted under MobileMark 2007. Battery performance will vary upon software applications, wireless settings, power management settings, LCD brightness, customized modules and environmental conditions. The battery has a limited number of charge cycles and may eventually need to be replaced by a Getac service provider. Battery life and charge cycles vary by use and settings.
iv. Weight varies from configurations and optional accessories.
v. MIL-STD-461F 90W AC adapter sold separately
vi. Tested by a national independent third party test lab following MIL-STD-810G
