LSR110
2D Barcode Reader

Rugged, high-performance, desktop 2D barcode reader for smartphones, tablets and paper

Description

The compact LSR110 is designed to read 2D barcode images, including QR codes, from smartphones and tablets, and works equally well with printed paper documents. It can read all popular linear, PDF417 and 2D symbologies.

The advanced recognition barcode imager is omnidirectional and has near-zero latency. It captures barcodes in less than one second of presentation in any orientation. Furthermore, the device is programmable with 2-way communication to intelligently interact with data capture and processing software and provide operator feedback.

This responsive, easy-to-use desktop device is intuitive and designed to be operated by untrained members of the general public. Additional user-friendly features include bright green LED visual indicators and a programmable audio beep to confirm successful data capture.

Its rugged construction, with no moving parts, enables the reader to withstand years of frontline, public use.

The LSR110 can be configured to connect directly to a workstation as well as with data format settings. Serial RS232 and USB (serial or keyboard) interface versions are available.

Barcode symbologies

2D barcodes, such as QR codes, offer the opportunity to incorporate significantly more information than a single line 1D barcode.

2D barcodes also offer error-correction options that allow the barcode to be read even if part of it has been destroyed or marked. Pixel-based 2D barcodes, such as QR or Aztec codes, are ideal for downloading to a mobile phone display.

QR Code

The QR code can contain up to 4,296 alphanumeric characters, (0–9, A–Z [uppercase only], space, $, %, *, +, -, ., /, :)

PDF417

2D stacked barcode

The PDF417 stacked 2D barcode can contain up to 1800 alphanumeric characters.

Common Linear barcodes

EAN / UPC
Interleaved 2 of 5
Industrial 2 of 5
IATA 2 of 5
Code 39
Code 128

Specifications

Reads following symbologies

Linear: EAN, UPC, Code 2 of 5, Interleaved 2 of 5, IATA 2 of 5, Code 39, Code 128
2D: IATA resolution 792, PDF417, Aztec, DataMatrix and QR codes
Interface options: RS232 and USB (serial and keyboard)
Performance: Will read in full sunlight, and also read 2D barcodes from smartphone displays
MTBF: 85,000 hours
